DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Re claim 1, the independent claim includes "counting a noisy failure when the fluctuation detection counter exceeds the first predetermined threshold; comparing a noisy failure counter with a second predetermined number, and warning of a noisy failure when the noisy failure counter value exceeds the second predetermined number" in combination with the remaining claim limitation is not taught and/or made obvious by the prior art. Elenich et al., considered closest to related art, teaches an actual sensor value may be filtered before being compared with the estimated sensor value to prevent noise in the actual sensor signal from causing false detection of sensor errors (See Col. 1, lines 46-51). Elenich et al. does not teach **counting a noisy failure when the fluctuation detection counter exceeds the first predetermined threshold; comparing a noisy failure counter with a second predetermined number, and warning of a noisy failure when the noisy failure counter value exceeds the second predetermined number.**

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
